Can we let go? The Getty Center is the microcosm
our whole world is full of centers built by fossil money
all the coal mines: sunk costs. all of the oil wells
have to be shut down all the fracking, there is no other way
to do it now, "all of this stuff still works!" someone will
shout but it never worked it only seemed to. We need
to build we also need to destroy if only by walking away.
Let the fire burn
