

INSTRUCTIONS

(with warnings attached)

This project requires a major commitment of time and effort.

All procedures must be completed diligently.

Please note --

There are many different segments within the construction period.

Scrutinize your parts list.

There are different models.

They are packed randomly.

Your parts list will define your model.

Construction technique will vary by model.

Before you begin

Read the instructions

Again and Again

Assure yourself that

you completely comprehend the instructions.

If at any time you are unsure of the next procedure

call the 1-800-helpline.

There is no room for an error.

The consequences are crystal clear.

Your mistake

may result in

Permanent Damage to your model.

Repair, though possible

is costly and can cause model failure.

The project may be

unalterably changed.

Most people will have

an acceptable result.

It is now time to begin;

When you feel that next contraction please push hard.

*this is important
to emphasize
here*
